

High Performance Films Market, Industry Analysis Report & forecast 2016 - 2024: Fractovia

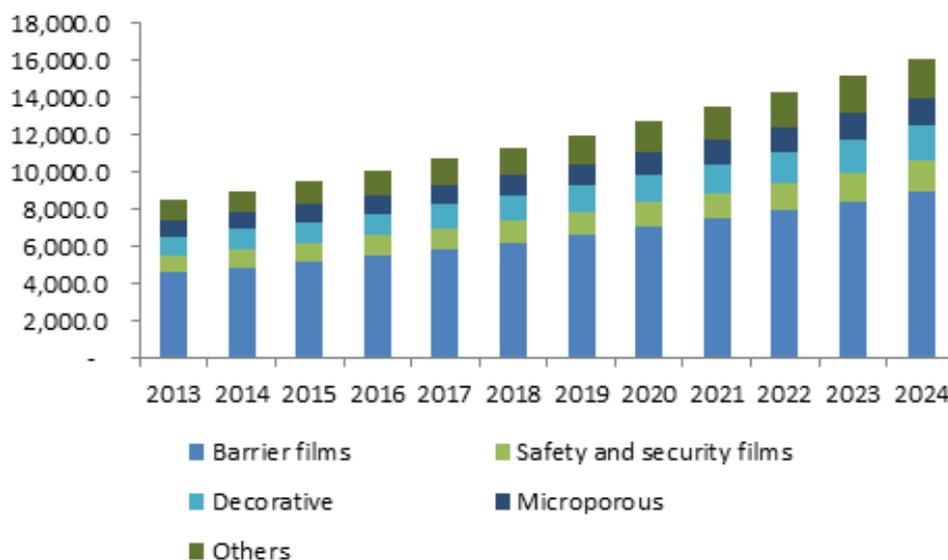

Global [high performance films market](#) is poised to witness an exponential upswing in the years ahead with a target market share of USD 54 billion by 2024. Evolving demand from sectors such as electronics, automobiles, construction, food & beverage, and packaging will provide a significant push to high performance films industry globally. The durability, chemical resistance, and flexibility of these materials make it ideal for a variety of applications across these industries.

Decorative, barrier, microporous, and safety & security films are the major high performance films applications. Barrier films applications, valued at USD 15 billion in 2015, will grow strikingly over the forthcoming years. High requirement of barrier films across PV cells & semiconductors due to its moisture resisting features will augment the industry expansion. High performance films market revenue in safety & security films is forecast to hit USD 5 billion by 2024.

High performance films Market also find extensive applications in end-use sectors such as construction, automobiles, packaging, personal care, and electrical & electronics sectors. High performance films market value in the construction sector is predicted to hit USD 3 billion by 2024, owing to its use for improving the functional and aesthetic features. High performance films industry size in electrical & electronics sector will experience a massive surge over the coming seven years, driven by its prominent applications in photovoltaic cells, insulation, and microphones.

Packaging applications, estimated at USD 20 billion in 2015, will witness a remarkable growth over the span of few years. Enhanced use of high performance films market in low oxygen technologies as well as vacuum packaging across meat processing sectors will drive the revenue.

In terms of regional trends, Europe high performance films industry is anticipated to observe a marked expansion over the next few years, driven by its popular use in the packaging sector. North America high performance films market, worth USD 4 billion in 2015, is forecast to experience a considerable growth over 2016-2024.

About Fractovia.Org:

Fractovia.org is one of India's leading in-house and free news portal. It is fully automated, and operates on a constant premise, interfacing with news sites and offering redesigned breaking features to readers across the globe. Our mission is to offer individuals opportunities for connections with news writers and distributors which they can pursue. We operate by mapping articles pertaining to breaking news, constantly and progressively, against a pre-determined word-based theme, offering important connections to readers and clients, as well as distributors.
