Rock wool, glass wool, and polystyrene are the various products of acoustic insulation industry. Polystyrene products are highly preferred for sound proofing owing to reduced operational costs and the fact that they require minimal installation tools. In consequence, polystyrene acoustic insulation market is predicted to surpass a revenue collection of USD 9 billion by 2025.

Glass wool product segment collected a revenue of more than USD 3 billion in 2015 and will record significant growth rate over the coming years of 2016 to 2025. This growth can be attributed to high tensile strength, light weight, exceptional resilience, and effective thermal & acoustic characteristics of the product.

U.S. acoustic insulation industry will generate a revenue of more than USD 5 billion by 2025, primarily fueled by the surging demand across the commercial construction industry.

China acoustic insulation market was worth USD 2 billion in 2015 and will exhibit significant growth rate over the period of 2016 to 2025. The growth can be attributed to the growing preference toward sound proofing and fire safety.

Russia acoustic insulation industry is predicted to collect a revenue of more than USD 1.8 billion by 2025.
