Increasing wine exports from Europe and rising edible oil demand from Southeast Asia are other vital factors causing a major upswing in bulk container packaging industry. These containers ensure safe and secure transport and storage which has led to soaring product demand. Bulk container industry encompasses bulk container liners, flexitanks and flexible intermediate bulk containers (FIBC) that can be accordingly used to transport solvents, food & beverages, chemicals, pharmaceuticals, and even sand.

FIBC market accumulated the highest share in bulk container packaging industry in 2015, owing to its increasing use in transporting detergents, polymers, building materials, and powdered non-hazardous chemicals.

Bulk container packaging market from chemical application is slated to grow lucratively at a CAGR of 10% over 2016-2024. Chemical manufacturers' inclination toward establishing their manufacturing units in APAC subject to the easy availability of raw materials and cost effectiveness is fueling Asia Pacific manufacturing base, in turn driving the regional bulk container packaging market share. APAC bulk container packaging industry is slated to have maximum growth in the coming years with a CAGR projection of 11% over the period of 2016-2024.

Food and beverage, which is another prominent application arena of the bulk container packaging market, accounted for almost 30% of the overall share in terms of revenue in 2015.
