

Data Center UPS Market Size to reach \$6.65 Billion by 2022: Global Market Insights, Inc.

Data center UPS Market Size is estimated to reach USD 6.65 Billion by 2022, as per a new research report by Global Market Insights, Inc. Amplifying acceptance of cloud computing coupled with falling tolerance limits pertaining to data loss are likely to boost global demand over the forecast period.

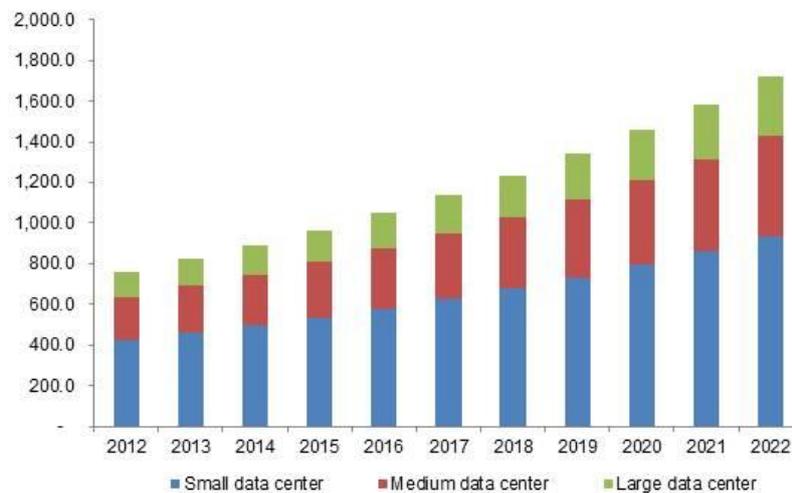

Small data center UPS market size led product sales and was valued at USD 2.1 Billion in 2014, with revenue expected to exceed USD 3.7 Billion by 2022. It is widely used in application areas such as server rooms, factory floors, enterprise data centers, industrial environments, localized & mid-tier data centers and medical imaging.

Increasing power outages causes installation of UPS in data centers to ensure smooth functioning of equipment. Use of ultra-miniature components in servers, storage systems and network devices make them vulnerable to falter and fail under power conditions. Deficiency of inventory supply owing to slowdown of the semiconductor industry is expected to pose a challenge to the industry growth.

Asia Pacific data center UPS market size by product, 2012-2022 (USD Million)
