Global Hyper Spectral Imaging System Market: Trends and Opportunities

Rising application of hyper spectral imaging system in surface vision and non-destructive testing is driving the growth of the growth of the market in developed countries. Hyper Spectral imaging system finds application in agriculture sector, eye care, food processing, mineralogy, surveillance and physics among others. The only factor restraining the usage of hyper spectral imaging system is the cost of acquiring these devices. Thus with technological innovation and reduction in the price of hyper spectral imaging systems in the near future is a key opportunity for the market growth especially in sectors like agriculture and food processing among others.

Global Hyper Spectral Imaging Systems Market: Key Segments

The hyper spectral imaging systems by systems have been segmented into PC Base, outdoor camera, airborne and others. The hyper spectral imaging system by end use industry has been segmented into military surveillance and homeland security, industrial, medical diagnostics, food processing, mineralogy, astronomy and others. The global hyper spectral imaging system market by geography has been broadly bifurcated into North America, Asia Pacific, Europe, Middle East and Africa and Latin America. The market for hyper spectral imaging systems has been provided in (USD Billion) in terms of revenue as well as the CAGR for the forecast period of 2016 to 2024.

Global Hyper Spectral Imaging Systems Market: Competitive Landscape

The competitive profiling of the key players in the global hyper spectral imaging system market has been exhaustively covered under the scope of the report. Furthermore, the different business strategies which have been adopted by the leading players in the global market have been included in this report. In order to provide a detailed insight into the market dynamics of global hyper spectral imaging system market, the drivers and restraints affecting the industry are included in the study. Furthermore, market attractiveness analysis has also been provided in the report.

Some of the key players in the hyper spectral imaging (HSI) systems market Norsk Elektro Optikk (Norway), Corning Incorporated (The U.S.) ,Applied Spectral Imaging, Inc. (The U.S.), Specim Spectral Imaging Ltd. (Finland), Resonon Inc. (The U.S.), Telops Inc. (Canada), Surface Optics Corporation (The U.S.), Chemimage Corporation (The U.S.), BaySpec Inc. (The U.S.), Headwall Photonics, Inc. (The U.S.), FLIR Systems (The U.S.), Teledyne Technologies International Corp (The U.S) and Thermo Fisher Scientific (The U.S.) among others.

The global Hyper Spectral Imaging System market has been segmented into:

Hyper Spectral Imaging System Market, by Systems

- PC Based
- Outdoor Camera
- Airborne
- Others

Hyper Spectral Imaging System Market, by End Use Industry

- Military Surveillance and Homeland Security
- Industrial
- Medical Diagnostic
- Food Processing

- Mineralogy
- Astronomy
- Others

Hyper Spectral Imaging System Market, by Geography: The market is broadly segmented on the basis of geography into:

- North America
 - The U.S.
 - Canada
 - Mexico
- Europe
 - United Kingdom
 - Germany
 - The Netherland
 - Rest of Europe
- Asia Pacific
 - China
 - India
 - Japan
 - Oceania
 - Rest of Asia Pacific
- Middle East and Africa

- UAE
- Saudi Arabia
- South Africa
- Others
- Latin America
- Brazil
- Argentina
- Others

About Researchmoz,

ResearchMoz is the world's fastest growing collection of market research reports worldwide. Our database is composed of current market studies from over 100 featured publishers worldwide. Our market research databases integrate statistics with analysis from global, regional, country and company perspectives.

ResearchMoz's service portfolio also includes value-added services such as market research customization, competitive landscaping, and in-depth surveys, delivered by a team of experienced Research Coordinators.
