Kangni VENDOR-Seamark ZM

www.seamarkxray.com

How to quickly detect the problem product and eliminate the defective product? An efficient and practical x-ray non-destructive inspection machine (NDT) is a good tool in the production process of an enterprise.

Nanjing Kangni Mechanical & Electrical Co., Ltd. (Kangni) is an innovation-oriented enterprise specialized in research and application of mechanical and electrical technologies. The "Kangni" brand has been registered in countries such as China, the UK, France, Germany, Austria, Italy, the US and Russia, and has been identified as a China Famous Brand.

Kangni is an established door system solution supplier for railway transport, whose clients include internationally renowned car builders such as Bombardier, Alstom and Siemens.

Kangni has cooperated with major car builders such as Bombardier. In addition, Kangni also provides related products such as interior fittings, power connectors, platform screen doors, new energy products for automobile industry and precision machining equipment.

Kangni Mechanical & Electrical Purchased Shenzhen Zhuomao Technology 1 sets Seamark ZM x-ray non-destructive inspection System (NDT) ZM-X6600, it used for inspect for vehicle electronics.

[Shenzhen Zhuomao Technology](#) has formed a high-tech industry platform with micro/nano detection technology as its core.

Shenzhen Zhuomao specializes in High-End users in the manufacturing industry, engineering applications and scientific research in the fields of new materials, advanced manufacturing, petroleum geology, life sciences, etc.

what Industrial X-Ray machine can do?

Defects that can be inspected by x-ray inspection equipment system include: soldering, bridging, insufficiency, insufficient solder, pores, device missing, etc.

Family of Industrial X-ray inspection machine & BGA rework station
