

Global Electronic Cleaning Solvents Market Analysis Report, Regional Outlook, 2016 – 2024: Global Market Insights, Inc.

[Global Electronic Cleaning Solvents Market](#) size is anticipated to witness high growth rate in terms of value during the forecast period.

Electronic cleaning solvents are used from a long period to get rid of unwanted contaminants like grease, oil, dust, flux, solder residues during the maintenance and manufacturing of electronic devices. As the name implies, electronic cleaning solvents are majorly used in electronics and electrical industry.

 [Table of Contents](#)

Electronic cleaning solvents are coming up as a fast-drying solvent that can be used effectively for quick and efficient cleaning of the electronic components. It is also used in the cleaning of switches, alarms, connectors, relays, terminal plugs, and other products. Electronic cleaning solvents can be used at any stage in the electronics devices manufacturing like servicing, repair or production.

Electronic gadgets have become an essential part of daily lives and this sector has grown at a rapid pace during last decade and is expected to depict a similar drift over the coming years. Increasing automation and digitalization has propelled the electronic industry and in turn will fuel the global electronic cleaning solvents market during the forecast period. rising population, rising middle class incomes are some of the factors expected to drive the global electronic cleaning solvents in developing regions.

To browse this report titled, ***“Global Electronic Cleaning Solvents Market Size by Product, By Application, Industry Analysis Report, Regional Outlook, Application Potential, Price Trend, Competitive Market Share & Forecast, 2017 – 2024”*** please click on the link below:

As per the product type the electronic cleaning solvents market is classified into fluorinated solvents, brominated solvents, formulated hydrocarbons, and petroleum distillates. Based on the cleaning process the electronic cleaning solvents market is divided into separated co-solvent process, mixed co-solvent process, vapor phase degreaser, vacuum cleaning process.

North America contributes major portion in terms of value in the global electronic cleaning solvents market. Well established electronics industry and the high level of automation in the countries like US makes this region a significant contributor in the electronic cleaning solvents market.

About Global Market Insights

Global Market Insights, Inc., headquartered in Delaware, U.S., is a global market research and consulting service provider; offering syndicated and custom research reports along with growth consulting services. Our business intelligence and industry research reports offer clients with penetrative insights and actionable market data specially designed and presented to aid strategic decision making. These exhaustive reports are designed via a proprietary research methodology and are available for key industries such as chemicals, advanced materials, technology, renewable energy and biotechnology.
