

Sodium Starch Glycolate Market products, applications & regional performance, 2016 – 2024: Global Market Insights, Inc.

The growth of [Sodium Starch Glycolate market](#) may be hurdled by the different food and drug association in different countries which have different norms and standards to be followed, prior to introducing the product in the market.

Global Sodium Starch Glycolate Market size is likely to witness moderate growth, expanding at a CAGR of near about 3% in the forecast period of 2016-2024. Sodium Starch Glycolate (SSG) is sodium salt of starch (Carboxy methyl ether) having a very fine, free flowing powder nature which is widely used in pharmaceuticals as a disintegrant in tablets and capsules formulations. It is also used as a suspending and gelling agent.

 [Table of Contents](#)

There are four main types of Sodium Starch Glycolate; namely, SSG type A, SSG type B, SSG type C and SSG USP NF. SSG Type A and SSG Type B are cross-linked salts of sodium, which is partly O-carboxymethylated potato starch. Whereas, SSG type C is formed as a result of cross linking of sodium salt of partly carboxymethylated starch, by physical dehydration. All the three types of sodium starch glycolates can be distinguished from each other by checking their pH value, sodium and NaCl content.

In terms of application, the product is used as a component for manufacturing processes in pharmaceuticals, food, textiles, paper and adhesives. SSG is generally used as rapid/ super disintegrant, it coats the pills and releases the medicine immediately when in contact with water. It is also used as food stabilizer and as an anti-aging agent for bread and in manufacturing of ice creams.

Technological advancements for producing and using Sodium Starch Glycolate is increasing gradually as medical and pharmaceutical industry have wide applications on a large scale globally. In case of food and beverage industry, the developing countries have huge market in developed countries, thus utilization of Sodium Starch Glycolate is higher in these regions of developing countries and growth opportunities higher for Sodium Starch Glycolate market in this region.

The major players in SSG market are DFE Pharma, Muby chemicals, Shree chemicals, Prachin chemical, Q'Max solutions, Captain industries, Shangyu Huachang industrial, Qingdao Haiyang Chemical and many more in the global space. In Sodium Starch Glycolate market, local companies, utilizing local raw material are having a better reach to customers, both domestic as well as international.

About Global Market Insights

Global Market Insights, Inc., headquartered in Delaware, U.S., is a global market research and consulting service provider; offering syndicated and custom research reports along with growth consulting services. Our business intelligence and industry research reports offer clients with penetrative insights and actionable market data specially designed and presented to aid strategic decision making. These exhaustive reports are designed via a proprietary research methodology and are available for key industries such as chemicals, advanced materials, technology, renewable energy and biotechnology.
