

Pelletized Activated Carbon Market Growth & Competitive Share, 2017 - 2024: Global Market Insights, Inc.

[Pelletized Activated Carbon Market](#) size is anticipated to grow at a significant rate during the forecast period.

Purchase This Report by calling Global Market Insights, Inc. at 1-888-689-0688 (Toll Free) or 1-302-846-7766.

It basically removes the organic contaminants from soil remediation vents, storage tank vents, gas process streams, industrial air emissions and internal work air environments. Rapid industrialization has increased pollution level in working atmosphere, this has necessitated air purification and thus propelled pelletized activated carbon market.

Reasons to Buy This Report:

1. Pelletized Activated Carbon Market size & share forecast by product & application
2. Growth drivers, pitfalls & industry challenges
3. Key Pelletized Activated Carbon Market growth opportunities & emerging business models
4. Competitive benchmarking with market share analysis and company profiles

Market research reports: Key analytical components

Pelletized activated carbon has another name as extruded activated carbon. It has the benefits of low dust content, high mechanical strength, and low-pressure drop owing to which it is used for solvent recovery in vapor phase or gas applications. Other applications of the compound include odour removal from gases and air, catalyst protector and supporter, purification of nitrogen and carbon dioxide emitted from industries, and as an air stripper.

The compound is consumed extensively for water purification. It can curb considerable amount of chlorine and volatile organic content (VOC) from drinking water. It is even capable of removing dissolved radon, lead and compounds that cause odour from water.

Based on the application, the market is segmented as mercury removing, industrial processes, air treatment and purification, and water treatment. As per the end-user industry, it is classified as agriculture, chemical, pharmaceutical, food & beverage, and automotive. Various raw materials used in the manufacturing of the compound are paddy husk, bamboo, lignite, coconut shell, wood and coal.

Asia Pacific is expected to contribute significantly in global pelletized activated carbon market owing to its rapid industrialization. Business friendly government policies in India and China are attracting foreign investments in these countries.

Europe has a robust automobile market form past few decades as Germany is a hub for giant manufacturers including Audi, BMW, Opel, Volkswagen, and Mercedes-Benz. These vehicle manufacturers have resulted in progress of many other industries that serve vehicle manufacturing such as plastic composites, adhesives, paints & coatings etc.

Prominent manufacturers in the market include Carbotech AC GmbH, Clarinex Group, Carbon resources LLC, MeadWestvaco Corporation, Carbon activated Corporation, Cabot Corporation, Siemens Water Technologies Corp, Carbotech, Ada Carbon Solutions LLC, and Calgon Carbon Corporation.

About Global Market Insights

Global Market Insights, Inc., headquartered in Delaware, U.S., is a global market research and consulting service provider; offering syndicated and custom research reports along with growth consulting services. Our business intelligence and industry research reports offer clients with penetrative insights and actionable market data specially designed and presented to aid strategic decision making. These exhaustive reports are designed via a proprietary research methodology and are available for key industries such as chemicals, advanced materials, technology, renewable energy and biotechnology.
