Qun-Da Technology Purchased SMT lines from Japan JUKI KE2060E and KE2050E for meet customer's need, two month ago, they purchased ZM x1000 X ray SMD counter machine to counting component Tray reel quickly, Fast counting speed to save manpower and time, around 10-15S/Reel, And No need to open the sealed package & take out moisture barrier bag, good choice for high sensitive components counting. The X ray SMD counter Integrated to all major ERP/MES systems, and Connect with label printer, can apply new label with new quantity at once.

Fully automated equipment for better productivity.
